

Vol. 05 | Issue 03 | July - September 2013

Editorial

Dear Readers,

It is a feeling of contentment, when I again connect myself with the scholars and researchers of my field through the release this issue of our prestigious journal. I must thank my editorial team for bringing together two important aspects of physiotherapy namely "change" and "practice". While we are still in process of evolving standards of best practices; I am sure, our journal provides a medium for researchers to put forth new ideas and facts for its furtherance. A valid evidence is all that is required to reinforce scientific basis of physiotherapy and combat challenges faced by our profession. A local resource with data, information and guidelines is being consolidated by every intellectual work published in journals or other resources. I am happy that many physiotherapists are contributing to its development story.

The research ideas and initiatives happening around and coming across are quite encouraging. Many of them being eye-opener for me personally! While I congratulate all authors for their valuable inputs and contributions

Our unsung editorial team remains the powerhouse behind our modest attempts and initiatives and I realize it at every stage of this publication. I stand behind my editorial team to keep it erect against all odds.

On behalf of this my colleagues & contributors of this publication, Welcome!

Sanjeev Gupta
 Editor-in-Chief

Contents

	Comparison of efficacy of modified hold relax,static stretching and dynamic stretching in increasing the static and dynamic hamstring flexibility <i>Harpreet, Chaya Garg and Jitender Munjal</i>	212
