

Vol. 04 | Issue 01 | January - March 2012

Editorial

Dear Readers,

Once again I hereby connect myself with the scholars and researchers of my field through the release this issue of our prestigious journal. I must thank my editorial team for constantly striving to converge the important aspects of physiotherapy namely "change" and "practice". While we are still in process of evolving standards of best practices; I am sure, our journal is providing a platform for researchers to put forth new ideas and facts for its furtherance. I am happy that more and more physiotherapists are approaching us to be a part of this publication in one or other capacity.

The research endeavors taking place in the field of physiotherapy are quite encouraging. I congratulate all authors for their valuable inputs and contributions.

Our unsung editorial team remains the powerhouse behind our modest attempts and initiatives and I realize it at every stage of this publication. I stand behind my editorial team to keep it erect against all odds.

On behalf of this my colleagues & contributors of this publication, Welcome!

Sanjeev Gupta
Editor-in-Chief
